SUMMARY

Backend-focused software developer based in Colombia. I build REST APIs and microservices with Python and FastAPI, model and query relational databases with SQL and PostgreSQL, and integrate AI capabilities into real products. I also have knowledge of Microsoft Azure and hands-on experience with Windows Server (installation, configuration, user/group/permission management, and services). I care about clean architecture, well-documented APIs, and reliable, scalable services.

CORE SKILLS

Backend: Python, FastAPI, Express (Node.js), REST APIs, Microservices

Data: PostgreSQL, SQL, data modeling, Firestore

AI: LLM integration, embeddings, AI-powered features

DevOps: Docker, Git, CI/CD, deployments (Vercel), Microsoft Azure, Windows Server, Microsoft Azure, Windows Server

Frontend: Flutter, Dart (mobile), React + Vite, Expo

Quality: Jest, unit/integration tests, code reviews, technical audits

CERTIFICATIONS

Bases de Datos SQL en Azure
Coursera

Software Design as an Element of the Software Development Lifecycle
University of Colorado System

Intermediate Object-Oriented Programming with Java
Coursera

Estructuras de datos en Python
Universidad Austral

Client Needs and Software Requirements
University of Alberta

Reviews & Metrics for Software Improvements
University of Alberta

SELECTED PROJECTS

DirectMarket
Backend · 2026

A marketplace whose core is an Express REST API over PostgreSQL: JWT authentication, product and transaction services, a hybrid escrow flow with unique 8-character release codes, Jest unit and integration tests, and Docker Compose — plus a React + Vite frontend.

Code: github.com/Henao00/DirectMarket
Node.js · PostgreSQL · Docker

TuContacto
Backend / Mobile · 2025

A contacts platform with a serverless Firebase backend: authentication, Firestore data modeling with security rules and indexes, and Cloud Storage for images — consumed by a native Expo app.

Code: github.com/Henao00/TuContacto-
Firebase · Firestore · Expo

T&M Cotizador
Mobile · 2026

A Flutter app built on a clean data model and business rules: it converts area to volume by thickness, manages an editable price catalog and quote history with local persistence, and generates professional PDF quotes — 100% offline.

Code: github.com/Henao00/T-M-Cotizador

Flutter · Dart · Offline

Ubux — Web Audit

Audit · 2026

A technical web audit for Ubux, a technology company: I reviewed user flows, performance and accessibility, then turned the findings into prioritized, actionable improvements.

Report: ubux-web.vercel.app

QA · Performance · UX
